EDUCATION

November 2019 - December 2026   *Obafemi Awolowo University, Ile-Ife*

SKILLS

Programming Language: *HTML, CSS, JavaScript, React, Python*

Frameworks & Libraries: *Nodejs, ReactJs, TailwindCSS, SASS, Bootstrap, React Query, Context API, Django, JQuery, Ajax*

Database: *MongoDB, PostgreSql, dbSqlite, Atlas*

Tools: *Git/Github, Visual studio Code, Postman API*

Soft SKills: *Teamwork, Effective Follow Up Communication, Drive & Initiative, Creativity, Speed Accuracy.*

PROFESSIONAL SUMMARY

I am a passionate Full-Stack Developer and Engineer with a strong focus on Backend Engineering using Python/Django and React/Node.js.
I founded ENGISOL (Engineering-Solutions) to offer expert services in web development and graphics design.

I studied Computer Engineering and have a keen interest in both software and hardware, including robotics hardware engineering .

I have successfully built and delivered responsive, user-friendly real-life web applications for various clients with an experience of 4 years.

I'm skilled in RESTful APIs, database systems like MongoDB, PostgreSQL, web scraping, other integrated technologies and microcontroller-based hardware solutions.

PROFESSIONAL WORK EXPERIENCE

Fabrics stores, Churches   Jan. 2020 – 2024
Graphics Designer (Remote)
- Worked on a wide range of graphics design projects including flyers, posters, mockups, logos, wedding invitations, business cards, social media carousels, video editing, and animations.
- Delivered visually compelling assets tailored to various branding styles, resulting in high client satisfaction and repeated commissions.
- Utilized tools like pixellab, canva, renderforest and After Effects to produce high-quality visual content across digital platforms.

company on Fiverr   August. 2020 - 2023
Frontend Web Engineer (Remote)

- Designed and developed responsive landing pages and full websites including portfolios, blogs, chat apps, and social media platforms.
- Collaborated with international clients to deliver clean, maintainable code and appealing UI designs, earning consistent 5-star reviews.
- Leveraged HTML, CSS, JavaScript, and React to build seamless user experiences with strong visual appeal and fast performance.

Afternoon-Prep
Backend Web Engineer (Remote) & graphics designer

USA, America
Jan. 2022 – Dec. 2024

- Led backend development and debugging efforts for multiple web platforms including a YouTube-style video platform and AI-powered applications.
- Developed robust RESTful APIs, performed rigorous database configuration using MongoDB and PostgreSQL, and built advanced web scraping systems.
- Collaborated on machine learning projects and API testing with Postman, and contributed to branding by assisting in logo design.
- Delivered optimized and secure backend systems with scalable architecture, improving platform reliability and performance.

Sellam.io
Frontend Web Engineer (Remote Contract)

Osun, Nigeria
Dec. 2024 – Jan. 2025

- Designed and developed responsive full website for heavy e-commerce platform incorporated with real time chat app platform of 53 pages minimum.
- Worked with Ui/Ux team workflow in bringing the concept to life via coding and user friendly ,highly responsive across all devices.
- Exclusive coding in the display movement and part animations of the website.
- Leveraged on advanced frontend technology React, Nodejs for slight backend works and JavaScript to build seamless user experiences with strong visual appeal and fast performance.
- Delivered a fast accurate job completion within 10-15 days for at least 53 pages website to amaze the client.

PERSONAL PROJECTS

Fullstack complete Web Engineer

October 2021 - November 2024

- Worked on several full-scale backend projects including e-commerce, inventory management systems, social media apps, blogs, admin dashboards, and education platforms.
- Specialized in building secure, scalable, and responsive backend services using Python, Django, Node.js, React and REST APIs.
- Integrated complex features like authentication systems, data analytics dashboards, and admin controls tailored to each project's unique needs.
- Creation of logic algorithm backend for supermarket retail store order receipt payment system.
